an excerpt from the author's preface this manual is intended for the use of those who desire some knowledge of statistical methods and statistical results without going deeply into technicalities or undertaking mathematical analysis it is hoped that it will be of service to all who have occasion to use statistics in their own business or profession or who take an intelligent interest in public affairs it is also designed as a first course in statistics for students who wish to proceed further in the subject and if it serves its purpose will stimulate interest in the many fascinating problems that await solution and that can only be attacked by the methods of modern mathematical statistics the first part deals with elementary methods and with such technical terms and ideas as are indispensable in the handling of numbers on a large scale in the second part the origin of many groups of public statistics is shown their adequacy is

criticized and some of the more interesting results which are based on them are briefly summarized this part is intended as a guide to official statistics not as a compendium or dictionary of them and the problems attacked are given rather as illustrations than as substantial contributions to knowledge to facilitate the use of the book in the hands of teachers a number of exercises of various degrees of complexity are given in appendix i every serious student of commercial or public affairs should be acquainted with the nature of the contents of the statistical abstract of the united kingdom to promote this knowledge and because many pages of headlines and figures would otherwise have been necessary a large proportion of the examples relate to tables in the abstract for 1909 for which future or earlier abstracts can readily be substituted appendix ii contains a short list of blue books which should be easily accessible in the library of every institution where the subject of statistics has a place in the curriculum

a thorough collection of methods of making statistical inferences this text covers sign tests linear multiple and nonlinear regression correlation reliability quality control fiducial limits chi square runs more includes 32 tables and charts

this book was written to provide guidance for those who need to apply statistical methods for practical use while the book provides detailed guidance on the use of minitab for calculation simply entering data into a software program is not sufficient to reliably gain knowledge from data the software will provide an answer but the answer may be wrong if the sample was not taken properly the data was unsuitable for the statistical test that was performed or the wrong test was selected it is also possible that the answer will be correct but misinterpreted this book provides both guidance in applying the statistical methods described as well as instructions for performing calculations without a statistical software program such as minitab one of the authors is a professional statistician who spent nearly 13 years working at minitab and the other is an experienced and certified lean six sigma master black belt together they strive to present the knowledge of a statistician in a format that can be easily understood and applied by non statisticians facing real world problems their guidance is provided with the goal of making data analysis accessible and practical rather than focusing on theoretical concepts the book delivers only the information that is critical to success for the practitioner it is a thorough guide for those who have not yet been exposed to the value of statistics as well as a reliable reference for those who have been introduced to statistics but are not yet confident in their abilities

packed with exercises checklists and how to sections this robust lab manual gives students hands on guidance and practice for analyzing their own psychological research the lab manual s four sections include activities that correspond directly with the chapters of dawn m mcbride s the process of statistical analysis in psychology activities related to data analysis projects including data sets that students can manipulate and analyze activities designed to help students choose the correct test for different types of data and exercises designed to help students write up results from analyses in apa style
